

DUDLEY GROUP OF HOSPITALS NHS TRUST

ORAL AND MAXILLOFACIAL SURGERY

**DENTAL CORE TRAINEE DETAILED POST DESCRIPTION
TIMETABLE & RELEVANT INFORMATION**

Updated 29/01/2024

Introduction

The Dental Core Trainee timetable at Dudley Group of Hospitals promotes active clinical and surgical participation in all areas of the oral and maxillofacial specialty. Emergency cover at junior DCT level in OMFS is done during the day at Russell Hall Hospital in combination with New Cross Hospital at Wolverhampton for long days and nights.

DCTs working for DGH will be covering emergency cover at New Cross Hospital (Long day) from 08:00 hrs to 18:00 hrs according to 1:8 rota shared with the DCTs based at Royal Wolverhampton NHS Trust (New Cross Hospital)

One of the DCTs from New Cross Hospital will come to RHH to replace the DCT from RHH that is doing the long day. The DCT from NC will hold the bleep at RHH from 8:00 hrs to 17:00 hrs. The person in charge of the bleep at RHH has the responsibility to attend any ward call or A & E call as requested, also answer any telephone calls from GPs and GDPs, however, if there is no emergency call he/she still has to attend theatres sessions and OPD clinics depending on the day of the week.

The DCTs working for Dudley Group of Hospitals are not supernumerary; juniors are part of the OMFS team and will have a quota of patients in accordance with each consultant's clinic template and are expected to participate actively GA theatre sessions.

Trainees have responsibilities to participate in our Minor Procedure Room suite (MOS) sessions. (There will always be on site support and backup from middle grades and consultants) It is our duty to train all DCTs equally to achieve a level experience and confidence to work independently in Oral Surgery and familiarise with maxillofacial procedures.

It is mandatory that DCTs attend theatre's surgical lists and be expected to participate in ward rounds of surgical patients, be present in the theatre's briefings as well as assisting and performing some procedures under direct supervision in theatres lists. DCTs will be responsible for filling out discharge letters (TTOs), prescribing the medications in drug charts, discharging patients from the wards.

Annual and study Leave

We run on a strict rule of two (2) DCTs on site always. This rule exceptionally has been broken due to same day sickness of one of the trainees or other very special circumstances. Annual leave and study leave will be granted always in accordance to Trust policies of 8-6 weeks in advance and arrangements of prospective cover. There is a pre-request form that will have to be filled and countersigned by all other DCTs in order to request formal annual leave and study leave. More than 2 weeks of consecutive annual leave cannot not granted. Special circumstances can be

discussed for approval. Leave will be granted only if the two DCT on site rule is not broken or if cover is arranged internally. The Trust does not fund locums as product of annual leave at any level.

Sick leave

Sick leave will be granted in accordance to Trust's policies for sick leave. All sick leave absences will require direct notification (telephone call) to Medical workforce officer in RHH. No indirect notifications by another colleague email and/or text messages are accepted. A post sick leave return to work interview is required for every sick leave episode.

Other type of leave will be considered in accordance to Trust policies.
